

BMK-AD-ND Floor marking for eye and safety showers

Technical description

Floor marking for eye and safety showers

The B-SAFETY floor marking ensures optimum visibility and orientation of the location of the safety shower in emergency situations. With its eye-catching semi-circular design in green and white, information graphics for safety and eye showers, and directional arrow, it clearly marks the location of safety equipment. Thanks to its non-slip surface, it is particularly slip-resistant. The self-adhesive sign is water-repellent, robust and removable from industrial floors – ideal for use in work areas with increased safety requirements.

- For optimal orientation in an emergency
 - Water-repellent
 - Robust, durable
 - Long-lasting luminescence in accordance with DIN 67510-1:2020-05
 - Non-slip in accordance with EN 16165:2023-02 Class R10
- Manufacturer: B-SAFETY or equal
Article-No.: BMK-AD-ND

Technical specifications

Dimensions (H x W x D):	1 x 790 x 390 mm
Surface:	PEVA
