## Antibacterial additive for tank eye showers

### Technical description

Antibacterial additive for tank eye showers

- Active ingredients: sodium hypochlorite 19.5 mg/g and silver ions 0.82 mg/g
- Eliminates bacteria and viruses in 30 minutes and preserves water for up to 6 months
- Dosage 1 ml per 10 litres of water, sufficient for 1000 litres
- For use in plastic or glass. Check metals before use
- Dry in sealed original packaging in an upright position and store below 25°C
- Ideal preservative for water in water tanks
- Shelf life 2 years from date of manufacture

All ingredients used are approved for use in drinking water. It disinfects clear water quickly and safely and keeps it germ-free for up to 6 months. The oxidising effect of chlorine eliminates not only bacteria but also viruses and most protozoa and fungi. For clear, not for cloudy water, as suspended particles can impair the effect of chlorine and silver ions. Micropur Forte can be used wherever microbiologically unsafe tap water needs to be disinfected for drinking, cooking or washing.

**Use:** Add to the empty or half-filled water container and immediately top up with the desired amount of clear water. The resulting turbulence serves to mix Micropur Forte and water. Additional stirring is not necessary. If Micropur Forte is added after the container has been filled, the water must be stirred so that the active ingredients are evenly distributed. Dosage: 10 ml per 100 L of water. Leave for 30 minutes. For cold water (< 10°C), extend to 2 hours. Use only in clear water. Store in a cool place protected from light (< 25°C).

**Caution:** Toxic to aquatic life with long lasting effects. Avoid release to the environment. Keep out of reach of children. Avoid contact with eyes, skin and clothing (discolouration). Causes skin irritation and serious eye irritation. After contact with skin, wash with plenty of water. In case of contact with eyes, rinse with water for several minutes. Remove contact lenses, if present and easy to do, and continue rinsing. Take up spilled material. Dispose of contents/container in accordance with local regulations. First aid: If swallowed, rinse out mouth and then drink one glass of water.
